SUMMARY

Full Stack Engineer with 5+ years of experience building production-grade web systems end to end, spanning backend, frontend, databases, and deployment. Skilled in developing RESTful APIs and backend services with Go and Python (FastAPI, Flask), as well as web applications using PHP and CodeIgniter. Currently deepening expertise in Rust and the Axum framework for performant, type-safe backend development through personal projects. Experienced in building modern user interfaces with React and Tailwind CSS, and mobile applications with Flutter. Proficient in managing deployment pipelines with Docker and CI/CD, and integrating backend systems with ERP platforms such as Oracle NetSuite and Odoo. Focused on scalable system design, application performance, and code maintainability in collaborative engineering environments.

SKILLS

Languages: Go, Python, PHP, Rust, JavaScript, TypeScript, Dart

Backend & Frameworks: FastAPI, Flask, CodeIgniter, Axum, REST API

Frontend & Mobile: React, Tailwind CSS, jQuery, Bootstrap, Flutter

Databases: MySQL, PostgreSQL

DevOps & Tools: Docker, CI/CD, Git, Linux Ubuntu, PyCharm, VS Code

System Integration: ERP Integration (Oracle NetSuite, Odoo), POS Systems, HRIS, JWT Authentication

WORK EXPERIENCE

Full Stack Software Engineer (IT Programmer Analyst Officer)

June 2025 – Present

PT. Indobara Bahana

- Maintain and optimize production systems on an ongoing basis, identifying and resolving technical issues to minimize downtime and improve reliability.
- Design, develop, and implement new software solutions aligned with business needs, from requirements analysis through deployment.
- Manage and enhance ERP system integration (Oracle NetSuite) to synchronize data across systems and support cross-departmental business processes.
- Collaborate with cross-functional teams on system testing and analysis to improve functionality and minimize operational disruption.

Senior Full Stack Programmer

2022 – February 2025

PT. Sanggar Catur Utama

- Led development and optimization of enterprise management systems using Python (Flask, FastAPI) for backend, MySQL for data management, and React JS, Tailwind CSS, jQuery, and CodeIgniter for frontend.
- Reduced system load time by 15% through performance optimization and code refactoring, significantly improving user experience.
- Built scalable solutions with cross-functional teams using the Flask framework to streamline communication between frontend and backend.
- Implemented a POS (Point of Sale) system and HRIS (Human Resources Information System) from the ground up, increasing operational productivity by 20% and reducing manual data entry errors by 20%.

Senior Programmer

September 2019 – 2022

PT. Jaygee Group (subsidiary of PT. Sanggar Catur Utama, internal transfer)

- Built an attendance realization system and developed an employee attendance application deployed across all company branches.
- Developed and maintained the company's official website application.

Staff IT (Internship)

September 2017 – December 2017

PT. Baladhika Karya Raharja

- Completed a 3-month internship gaining hands-on experience in computer hardware troubleshooting, software installation, and basic network configuration.

Computer Technician (Vocational Internship)

January 2013 – April 2013

PT. Al-Azhar

- Completed a 3-month vocational internship gaining hands-on experience in hardware troubleshooting, software installation, and basic network configuration.

FEATURED PROJECTS

REST API Backend Service – Rust & Axum (Personal Project)

- Built a REST API backend service using Rust and the Axum framework with JWT-based authentication, PostgreSQL as the database, and Docker containerization for consistent development and deployment environments.

WDMS – Web-based Data Management System

- Built a web-based system to collect and manage employee fingerprint data from multiple outlet branches in real time into a centralized server, integrated with the HRIS system. Tech: Python Flask, Tailwind CSS.

POS System for Restaurants (Isoide & Nahm)

- Developed a point-of-sale system for two Japanese restaurants using PHP for frontend and Python Flask for backend.

HRIS – Human Resources Information System

- Developed a payroll, attendance tracking, and employee data management application that reduced HR team workload by 30%. Tech: CodeIgniter, Bootstrap.

Archive – Bookkeeping & Inventory Reporting System

- Developed an automated bookkeeping and inventory tracking application to reduce manual data entry errors. Tech: PHP (CodeIgniter), Tailwind CSS.

Mini Game Quiz

- An interactive web application for learning English vocabulary through word guessing games. Equipped with a data management system for admins.

EDUCATION

Universitas Indonesia Membangun

September 2018 – February 2022

Bachelor of Information Systems — GPA 3.42 / 4.00

CERTIFICATIONS

- Cisco Networking Academy — Indramayu (2017)

LANGUAGES

- **Indonesian:** Fluent (reading, writing, speaking)
- **English:** Intermediate (writing, listening), Basic (speaking) — actively improving

LEADERSHIP & VOLUNTEER EXPERIENCE

Chairman, KaliNew (Karangampel Linux Network)

2013 – 2015

Environmental Coordinator, Paguyuban Puri Living

2024 – 2025

- Led a team of volunteers maintaining residential community cleanliness, organized recurring cleanup activities, and coordinated logistics with property management, reducing resident complaints.
